Supply Chain Management Program

Halliburton is one of the world's largest providers of products and services to the energy industry. With more than 55,000 employees in approximately 80 countries, the company serves the upstream oil and gas industry throughout the life cycle of the reservoir—from locating hydrocarbons and managing geological data, to drilling and formation evaluation, well construction and completion, and optimizing production through the life of the field.

The Supply Chain Management Program is the ideal opportunity for graduates whose passion is excellence, and who are driven to continually develop, hone, and apply their leadership skills in an organization where opportunity is truly unlimited. Participants in the Program are exposed to the full Halliburton supply chain, from strategic sourcing to logistics, from manufacturing to materials management. Full-time and intern positions are available.
