A. Introduction

This document shows the step by step instructions on how to configure your BlackBerry phone to NUS wireless. Please note that the instructions may vary on the different versions of BlackBerry. The following instructions and illustrations are produced from BlackBerry Bold 9700.

B. Configure NUS wireless

1. From the main screen, navigate to the icon Manage Connections.

2. Check to turn on the Wi-Fi connection.
3. Scroll down to select **Set Up Wi-Fi Network**.

4. Select **NUS (WPA2 Enterprise)**.
5. Change the following settings accordingly.

a. Select **PEAP** for the Enterprise Sub-Type.

b. Under **Username**, enter `domain\NUSNET username` - domain refers to nusstf (for staff), nusstu (for students) or nusext (for visitors)

c. Under **Password**, enter your password for your NUSNET account.

d. For **CA Certificate**, select **thawte Premium Server CA**.

e. Check on **Disable Server Certificate Validation** and select **Connect**.
6. The setup will now validate your login credentials and settings.

7. Once successful, it will get connected to the NUS wireless network.
