

Mr. Felix Zhao
CTO
Azalea Networks

Felix (Fuyong) Zhao is the cofounder, CTO and VP of R&D of Azalea Networks. Felix has over 15 years of wireless & networking industry working experience. He designed and developed Azalea's core intellectual property and currently leads a core engineering team for the company's advanced research & development effort.

Prior to founding Azalea Networks, Felix worked as senior researcher at Cisco Systems where he had many inventions and co-designed/developed award-winning products such as cable router, mobile router and residential gateway. Felix also drove wireless sensor networking initiative and represented Cisco in ZigBee. Prior to Cisco, Felix worked as engineering manager and consulting engineer at Cable & Wireless IDC where he worked closely with customers and played a key role in designing telecommunication network solutions for many major enterprise customers.

Felix received two BS degrees (BSEE & BS Physics) from Tsinghua University, and has seven US patents on IP routing, QoS, radio architecture, and mobile wireless ad hoc networking etc.
