

Background & Introduction

**Welcome to the Inaugural Roundtable on Entrepreneurship Education
(REE) ASIA 2004 for Scientists and Engineers!**

**The 2004 REE ASIA Conference will be held from 29th to 30th July 2004
in SINGAPORE at the NUSS Kent Ridge Guild House,
National University of Singapore**

**Co-organized by
NUS Entrepreneurship Centre, National University of Singapore
Stanford Technology Ventures Program (STVP), Stanford University
& Lester Center for Entrepreneurship
& Management of Technology Program, University of California Berkeley**

This annual conference, previously known as Roundtable on Entrepreneurship Education for Engineers (REEE), is designed to gather business, science, and engineering faculty from leading universities in the world with the goal of accelerating entrepreneurship education for scientists and engineers. Specifically, REE offers an opportunity for established entrepreneurship programs to share their success stories, and for new and established programs to learn how to enhance their offerings. The conference includes a formal program and interactive workshops, as well as many opportunities for informal discussions with colleagues.

The first REE Conference was held in 1998 at Stanford University. The first European REE was held in London, in September 2001. The REE USA conference 2002 attracted over 75 members from 40 different universities. Please click [REE USA](#) and [REE Europe](#) for more details about their programmes.

The NUS Entrepreneurship Centre at the National University of Singapore is pleased to jointly organize the first REE in Asia with [Stanford Technology Ventures Program](#) (STVP) at Stanford University and the [Lester Center for Entrepreneurship & Management of Technology Program](#) at U.C. Berkeley.
