

## **Changi control tower, Merlion ranked Singapore's top heritage sites**

Changi Airport's control tower and the Merlion topped a list of 53 buildings, sites and structures in a study on perceptions of Singapore's built heritage.

The airport's iconic tower came in first while the mythical creature took second place in an Institute of Policy Studies' survey of 1,500 people aged 18 to 70, who ranked the duo as the "most important to them". The Singapore Science Centre and the Botanic Gardens – a Unesco World Heritage Site – were also ranked highly.
