**New degree programmes presenting the inaugural batch of graduates at  
NUS Commencement 2019**

**Master in International Affairs  
(Lee Kuan Yew School of Public Policy)**

The two-year full-time Master in International Affairs programme furthers the school's mission of educating current and future generations of leaders to improve the level of governance in Asia. The programme brings Asia's role as a key influencer in world affairs to the forefront and provides students with a strong foundation in both theoretical frameworks and practical knowledge of multi-disciplinary subfields of international relations, together with an immersive experience in Asia. A notable feature of the programme is its Asia-focused curriculum, considering the inter-linked nature of the world economy and Asia's rising influence in it.

The Master in International Affairs programme graduated 20 students from its inaugural batch in 2019.

**Master of Science (Food Science and Human Nutrition)  
(Faculty of Science, Food Science and Technology Programme)**

The Master of Science in Food Science and Human Nutrition offers a comprehensive set of advanced topics including food bioscience (microbiology and safety, fermentation), modern food processing technology, evidence-based functional foods, modern analytical science and human nutrition. This programme is designed to provide professional continuing education training, which in turn better prepare the workforce amid the rapidly changing food landscape.

There are four graduates from the programme this year.
