Q Search for research topics (search results will be in new tab)

- 2) To return to this “search result” again, move the mouse over the “Back” arrow icon located on the top left of IE browser and hold; the list will be displayed. Select the Google search to display the search results.

- 3) Once you open the pdf file, there will be a new menu “Go to”. Click on it and a list will display. Select the Google search and you will get the list of search results.

4) The search results will display on another window tab.

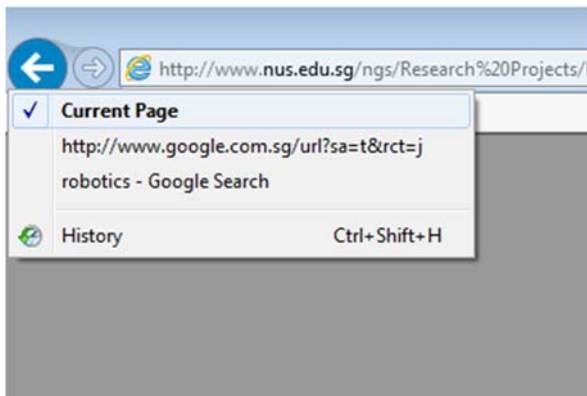

The screenshot shows a Google search results page in a browser window. The address bar contains the URL: <https://www.google.com.sg/search?q=robotics&domains=nus.edu.sg/ngs&sitesearch>. The search bar contains the text "robotics site:nus.edu.sg/ngs". The page displays "About 45 results (0.40 seconds)".

The search results are as follows:

5) After you click on a pdf file and view it, you will not be able to return to the page where you have the search results as shown in point 4. In order to view the search results again, you can do **EITHER (a) OR (b)**.

- Right mouse hold onto the “Back Arrow” icon until a drop-down list appears, as shown below. While still hold onto the mouse, move the mouse until the “robotics – Google Search” row. Release the hold on the mouse. ”. You will then be able to see the search results page shown in point (4).

OR

- Click on the menu “Go to” and select “robotics – Google Search”. You will then be able to see the search results page shown in point (4).

NOTES:

- The above instructions are useful when you read pdf files from “Search” results using IE.
- If you read webpages from “Search” results, you do not need to follow the above steps. Just need to use the “Back” Arrow icon on the top left corner of the IE web browser.
