Job Openings for Scientists @ A*STAR SIMTech

Interested in applying your knowledge to solve real-world problems? Want to be part of creating a more sustainable future? If yes, then the Sustainability and Life Cycle Management (SLM) Team of A*STAR SIMTech is looking for you. Join our team and develop solutions to help companies improve their resource and energy efficiency – thereby, reducing negative impacts on the environment.

Candidates should have a PhD in one of these related fields: Computing, data science, applied mathematics, statistics, business analytics, industrial systems engineering, modelling and simulation, or life cycle engineering/management.

About A*STAR SIMTech
The Singapore Institute of Manufacturing Technology (SIMTech) is a research institute of the Agency for Science, Technology and Research (A*STAR). We develop high value manufacturing technology and human capital to enhance the competitiveness of Singapore’s manufacturing industry.

SIMTech’s Roles:
- Generate, apply and commercialise R&D, and advance manufacturing science and technology through creating intellectual capital to enhance local industry’s competitiveness.
- Boost the human capital base in Singapore through manpower development initiatives such as industry research collaborations and training programmes for the industry.
- Enrich the industrial capital base from R&D collaborations outcome with the industry and the transfer of research results through technology training.
