

3 Graduate Education

The NUS Faculty of Engineering has about 300 distinguished faculty members and a graduate student enrolment of some 2,500. We are committed to the pursuit of academic excellence in a vibrant research community actively engaged at the forefront of ideas and innovation. The graduate experience helps students realise their full potential and prepare them for an increasingly borderless and innovation-driven global economy.

We believe it is just as important to infuse our students with a spirit of enterprise and the mind-set needed to thrive in an ever-changing global landscape. Our scholars have opportunities to learn from the best minds, not just in Singapore but beyond, because of our strong global partnerships with renowned universities. Their names are synonymous with the best in their field, including US Naval Postgraduate School (NPS), Monterey; French Grandes Écoles; Technische Universiteit Eindhoven (TU/e) and selected Indian Institute of Technology (IIT).

Apart from benefiting from an international exchange of ideas with a vibrant community of international faculty and students, prospective graduate students will discover a mosaic of graduate programmes — both coursework-based and research-based — covering various engineering disciplines to meet their areas of interests and needs.
