2.3.3 Master of Technology in IT Leadership [MTECH ITL]

Overview

The MTech ITL programme will equip students with the critical knowledge, hard and soft skills to lead technology value realisation in any organisation. These include taking on more complex responsibilities in handling accompanying risks, challenges and uncertainties, and the operation of stable, mission-critical systems.

The curriculum has been created in consultation with foremost IT and business leaders, and will be jointly delivered by NUS alongside practising Chief Information Officers and IT leaders.

Learning outcomes:

Be strategic, agile and innovative
Be operationally sound and smart
Create business value and understand financial implications
Effectively communicate ideas and strategic business cases
Nurture effective relationships with business partners, users and other stakeholders

The programme is offered on:

Full-time basis: Minimum of one year to maximum of two years
Part-time basis: Minimum of two years to maximum of four years
