4.5 Graduate Examinations, Coursework and Allied Health Programmes: Division of Graduate Medical Studies (DGMS)

Master of Medicine

The Master of Medicine offered by the Division is based on two to four years of clinical training in approved training hospitals. Assessments are based on multi-format examinations and generally taken by doctors during their training (known as Residency Training) towards becoming specialists.

The Master of Medicine degree is offered in the following specialties/disciplines:

1. Anaesthesiology
2. Diagnostic Radiology
3. Emergency Medicine
4. Family Medicine
5. Internal Medicine
6. Obstetrics & Gynaecology
7. Ophthalmology
8. Orthopaedic Surgery
9. Otorhinolaryngology
10. Paediatric Medicine
11. Psychiatry
12. Surgery

The DGMS also offers short one-to-two-week examination preparatory courses to specifically help candidates prepare for their examinations. These are usually held a few weeks before the examinations. Any doctor may enrol although priority may be given to those taking the examinations.

Graduate Diploma Programmes

The Division offers part-time Graduate Diploma programmes in Family Medicine, Family Practice Dermatology, Geriatric Medicine, Mental Health, Occupational Medicine and Palliative Medicine for doctors (mainly GPs practising in Singapore).

Master of Science (Speech and Language Pathology)

The Master of Science (Speech and Language Pathology) programme is a two-year professional practice training course designed for graduates from any discipline who seek careers working with children and/or adults as speech and language pathologists. The programme covers 18 compulsory modules, four of which involve clinical placements in local hospitals and social service centres. Problem-based learning, with local case studies, provides the foundation for the academic modules, and students are expected to conduct a research project relevant to evidence-based practice in their final year.

Master of Science (Audiology)

This graduate-entry programme addresses the public demand for locally trained Audiologists. It is the only coursework-based study of its kind in Singapore and is offered in collaboration with the University of Melbourne. It is customised with a distinct Asian framework and distinguishes itself from other programmes by incorporating a multi-disciplinary approach with related modules covering psychology, public health, engineering, business and innovation. Students are given the opportunity to integrate academics, clinical practice and research, which will be carried out in a purpose-built facility, clinic and in collaboration with government research institutes, universities, industry and international partners.
