“My aspiration is to provide students with a stimulating education and encourage them to set new limits.”

Along his journey in pursuing three Master’s degrees and a PhD, Dr Kua took on roles as mentor and professor at NUS and broke records as a triathlete. His passion for research, teaching and alma mater, as well as his keen spirit in scaling sporting heights are an inspiration to his students. As a global university centred in Asia, NUS offers a broad spectrum of opportunities and challenges for you to realise your full potential.
