CITATION FOR ASSISTANT PROFESSOR FENG JIASHI
YOUNG RESEARCHER AWARD

Assistant Professor Feng Jiashi is a brilliant scholar who works on artificial intelligence, machine learning, and computer vision. He investigates the application of deep machine learning to the development of computer vision.

Within five years of joining the Faculty of Engineering, Jiashi received recognition through his international best paper awards and his wins at international challenges. He has also secured multiple research grants from international AI companies.

Jiashi's research goal is to enable computers to learn new knowledge as fast as humans. This involves algorithms for fast object recognition adapted to new environments. His future plans are ambitious and they include revolutionising artificial general intelligence.

Please join me in congratulating Assistant Professor Feng Jiashi on winning the Young Researcher Award this evening!
