PROGRAMME DETAILS		
4	**Academic Content**	The [Class Schedule](#) in the Berkeley Academic Guide has been updated with all summer course offerings and we are happy to announce that there are still over 600 classes with open seats (as of 24 April 2020)! There are two types of classes being offered, remote and online, please see the description of each below. **Online Courses:** These classes are asynchronous in format. This means that there are no lectures held in real-time. The courses are broken into modules that need to be completed within a certain timeline. Students will have the freedom to login at their own convenient time and listen to lectures, view video clips, get reading assignments, post questions, take quizzes, participate in discussion sessions, and submit homework. Course material, as well as technical support, is available 24/7. The instructor and GSI(s) will also be available during virtual office hours that will be provided on the syllabus or at the start of the course. You can find a list of online undergraduate courses through the [Class Schedule](#) when you filter for ["summer 2020", "online courses", "lower division", and "upper division"](#) in the left-hand column. All other classes in the Class Schedule are remote classes (please see below). **Remote Courses:** These courses were previously held in-person but have been approved for virtual remote instruction given the complications with COVID-19. The virtual format of each course will be at the discretion of the academic department and course instructor. Many of these classes may be synchronous in format and will adhere to the schedule lecture/discussion times listed in the [Class Schedule](#) unless otherwise noted. If you are seeking specific information regarding a remote course format, you may want to reach out to the instructor or the academic department offering the course for more information. Here are instructions for how to find [Department & Instructor Contact Information](#). **No Enrollment Requirements:** International students taking online or remote courses from their home country will not need to meet the [full-time unit requirements](#) as these requirements are only for students studying in the U.S. in F-1 status. Students may enroll in one or more classes from any session or multiple sessions. **Disc*2020 - Design & Innovation for Sustainable Cities (Special Course)** In addition to course offerings through its regular Summer Sessions, Berkeley is also offering a special module through the International Alliance of Research Universities (IARU) for Summer 2020. Please find more information on the special module at the link below. Please note this programme has a different application process and fee structure from the regular Summer Sessions track. https://ced.berkeley.edu/academics/summer-programs/discovery
