Note: The CHS common modules listed above are prescribed. If there is no mapping approved with the modules offered by USP/UTCP/RVRC, you must read the modules under the CHS-approved prescribed modules posted at https://chs.nus.edu.sg/programmes/#prog-overview .				

Annex A

For example, if you read GEA1999, it is not a prescribed module on the list. You would still need to read GEA1000 or other modules on the CHS prescribed list. GEA1000 will concurrently fulfil the CHS core and the Data Literacy pillar requirements. Hence, GEA1999 will be an excess module not counted towards your DDP requirements but the grade will still be factored into your CAP.

We note that you may read fewer USP/UTCP/RVRC modules. Thus, please refer to the main table for the outstanding CHS requirements.
