Note: The CHS common courses listed above are prescribed. If there is no mapping approved with the courses offered by NUSC/UTCP/RVRC/Acacia, you must read the courses under the CHS-approved prescribed courses posted at https://chs.nus.edu.sg/programmes/#prog-overview.

For example, if you read GEA1999, it is not a prescribed course on the list. You would still need to read GEA1000 or other courses on the CHS prescribed list. GEA1000 will concurrently fulfil the CHS core and the Data Literacy pillar requirements. Hence, GEA1999 will be an excess course not counted towards your DDP requirements but the grade will still be factored into your CAP.

We note that you may read fewer NUSC/UTCP/RVRC/Acacia courses. Thus, please refer to the main table for the outstanding CHS requirements.

The course mapping for UTCP students is based on the assumption that you would complete the programme. If you were to exit from the programme mid-way, please refer to the final course mapping that will be emailed to you from the UTCP administrators.
